

FLEX PRINT

CLEARFLEX MATTE

ClearFlex is a transparent polyurethane flex film, developed for eco-solvent or solvent inks. Extra light and stretchable, ClearFlex offers a great solution for all white and light colored fabrics.

Once printed and applied ClearFlex is so thin and stretchable that it almost feels like a screen printed image. Mirrored printing for total protection. No application tape needed!

SUITABLE FOR STANDARD TEXTILES

TEXTILES FOR CLEARFLEX

ClearFlex also works fine with light coloured fabrics such as light yellow or light blue. Just make sure that the colour of the fabric is not dominant in the printed artwork.

FEATURES:

- Transparent flex for white and light colored textiles
- Heat sealable PU
- Oeko-Tex: Class I
- Thickness (without liner): 40 µ
- Printable with Ecosolvent & Solvent-Inks
